

GOVERNOR'S OFFICE OF CRIME PREVENTION, YOUTH, AND VICTIM SERVICES

Restrictive Housing

Data Definitions and Reporting Guide

This *Restrictive Housing: Data Definitions and Reporting Guide* provides information and guidance regarding the submission of restrictive housing information, as required by Chapters 526 and 527 of 2019. Created with input from key stakeholders from the Maryland Correctional Administrators Association, and sponsors of the bill, this guide serves to identify the reporting requirements, a definition for each required data element, and instruction on the submission of all restrictive housing information. **To quickly access one of these areas, please select from the following list.**

Introduction	2
Data Definitions	3
Reporting Period	3
Reporting Guide	4

Introduction

Chapters 526 and 527 of 2019 (House Bill 1001/Senate Bill 774), *Correctional Services - Restrictive Housing - Reporting by Correctional Units and Requirements Relating to Minors*, amended §§ 9-614(b) and 9-614(b)(2) of the Correctional Services Article to expand the submission of restrictive housing information from the Department of Public Safety and Correctional Services, only, to all correctional units within each jurisdiction. Specifically, and in accordance with § 9-614(b) of the Correctional Services Article, each correctional unit must submit restrictive housing information, from the preceding year, to the Governor’s Office of Crime Prevention, Youth, and Victim Services (previously known as the Governor’s Office of Crime Control and Prevention¹) by December 31 of each year, as it relates to the following:

1. The total population of the correctional unit;
2. The number of inmates who have been placed in restrictive housing during the preceding year by age, race, gender, classification of housing, and the basis of the inmate’s placement in restrictive housing;
3. The number of inmates with serious mental illness that were placed in restrictive housing during the preceding year;
4. The definition of “serious mental illness” used by the correctional unit in making the report;
5. The number of inmates known to be pregnant when placed in restrictive housing during the preceding year;
6. The average and median lengths of stay in restrictive housing of the inmates placed in restrictive housing during the preceding year;
7. The number of incidents of death, self-harm, and attempts at self-harm by inmates in restrictive housing during the preceding year;
8. The number of inmates released from restrictive housing directly into the community during the preceding year;
9. Any other data the correctional unit considers relevant to the use of restrictive housing by correctional facilities in the State; and
10. Any changes to written policies or procedures at each correctional unit relating to the use and conditions of restrictive housing, including steps to reduce reliance on restrictive housing.

Furthermore, and in accordance with § 9-614(b)(2) of the Correctional Services Article, the Governor’s Office of Crime Prevention, Youth, and Victim Services must make the information

¹ Maryland General Assembly. (2020). [*Chapter 11, Acts of 2020*](#). In March 2020, the Governor’s Office of Crime Control and Prevention was renamed the Governor’s Office of Crime Prevention, Youth, and Victim Services.

available on its website and, when the information has been received from every correctional unit, promptly submit the information in a report to the General Assembly.

Data Definitions

The following definitions must be used when submitting restrictive housing information:

Correctional unit means a unit of Maryland State or local government that is directly responsible for the care, custody, and control of individuals committed to the custody of the unit for the commission or alleged commission of a crime or an act that would be a crime if committed by an adult.² Correctional unit includes the Department of Public Safety and Correctional Services; the Department of Juvenile Services; and the office of the sheriff or other unit of government with responsibility for operating a local correctional facility or county detention center.

Restrictive housing means a form of physical separation that has not been requested by the inmate in which the inmate is placed in a locked room or cell for approximately 22 hours or more out of a 24-hour period.³ Restrictive housing includes administrative segregation and disciplinary segregation.

Administrative segregation means a form of physical separation of an inmate from the general population determined by the classification process or authorized personnel when the continued presence of an inmate if the general population would pose a serious threat to (1) life; (2) property; (3) self; (4) staff or other inmates; (5) the security of orderly functioning of the facility; or (6) the well-being of society.⁴

Disciplinary detention means a form of physical separation in which an inmate found guilty at a disciplinary hearing is confined apart from the general population for a designated period of time.⁵

Reporting Period

All jails must compile and submit their data in the described format (see below) no later than December 31st each year covering the reporting period of October 1st - September 30th with the first set of data collection to begin on October 1, 2020.

Reporting Guide

All restrictive housing information can be entered into an excel spreadsheet which includes the data elements required by Chapters [526](#) and [527](#) of 2019. A description of the data elements, to include the available selections for each, is provided below.

#1. The total population of the correctional unit.

This DOES NOT need to be entered into the excel spreadsheet. This information will be obtained from monthly jail statistics reports compiled by the Department of Public Safety and Correctional Services. Two measures will be calculated including the total number of intakes and the average monthly daily population for the October 1 - September 30th reporting period each year.

#2. The number of inmates who have been placed in restrictive housing during the preceding year by age, race, gender, classification of housing, and the basis of the inmate's placement in restrictive housing.

The template will designate eight columns to capture this data element, to include the following:

ID#: A unique identifier must be provided for each inmate who has been placed in restrictive housing during the reporting period.

- If an individual is placed in restrictive housing multiple times during the reporting period, include the same ID # as his/her first placement. This way we can track the total number of inmates placed and the total number of placements.

Age: Provide the date of birth for each inmate placed.

Race: Select the race for each inmate placed, based on the following options:

- American Indian or Alaskan Native
- Asian
- Black
- Latino/Hispanic
- Native Hawaiian/Pacific Islander
- White
- Other

Gender: Identify the gender of each inmate placed, based on the following options:

- Male
- Female
- Transgender

Classification of Housing: For the classification of housing, select one of the following options:

- Minimal
- Medium
- Maximum
- Special needs
- Other

Other: If other is selected for the classification of housing, write out the applicable classification.

Reason for Housing: Select the most appropriate reason for placement, based on the following options:

- Medical
- Administrative
- Disciplinary
- Protective Custody
- Quarantine
- Other

Other: If other is selected for the reason for housing, write out the applicable reason.

Quarantine should only be selected for restrictive housing related to COVID-19. All other medical reasons would fall under the “medical” category.

#3. The number of inmates with serious mental illness that were placed in restrictive housing during the preceding year.

The template will designate one column to capture this data element, to include the following:

SMI: Use the “dropdown” menu to select if the inmate had serious mental illness when placed into restrictive housing.

- Yes
- No

Please note that by selecting “Yes,” this indicates that the inmate was diagnosed with (or assumed to have) serious mental illness at the time of his/her confinement in restrictive housing.

#4. The definition of “serious mental illness” used by the correctional unit in making the report.

Provide your correctional units’ definition of serious mental illness that was used when reporting restrictive housing information for this report. This will be entered into tab 2 of the excel spreadsheet. Just provide your definition in column B1.

*Please note that the Department of Public Safety and Correctional Services defines serious mental illness in accordance with the Code of Maryland Regulations (COMAR) 10.21.17.02 (76).⁶ “This generally includes individuals with schizophrenia disorder, major affective disorder, other psychotic disorder; or borderline or schizotypal personality disorder, based on a diagnosis consistent with the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-5).”⁷ “These individuals have demonstrated inability to maintain social support and independence within the community, and may require additional assistance with basic living skills.”⁸

#5. The number of inmates known to be pregnant when placed in restrictive housing during the preceding year.

The template will designate one column to capture this data element, to include the following:

- Pregnant:** Use the “dropdown” menu to select if the inmate was known to be
When placed in restrictive housing
- Yes
 - No

#6. The average and median lengths of stay in restrictive housing of the inmates placed in restrictive housing during the preceding year.

The template will designate two columns to capture this data element, to include the following:

- Start Date:** Provide the date in which the inmate was placed in restrictive housing
(intake date into segregation).

⁶ Department of Public Safety and Correctional Services. (2020). [*Report on Restrictive Housing - Fiscal Year 2019.*](#)

⁷ Ibid.

⁸ Ibid.

End Date: Provide the date in which the inmate was removed from restrictive housing (released from segregation).

- Using those two data elements, we can calculate the average and median length of stay ourselves.
- Please note we will not add the lengths of stay together for individuals placed in restrictive housing multiple times during the reporting period. We will take an average of those placement lengths.

#7. The number of incidents of death, self-harm, and attempts at self-harm by inmates in restrictive housing during the preceding year.

The template will designate three columns to capture this data element, to include the following:

Death: Use the “dropdown” menu to select if the incident resulted in a death:

- Yes
- No

Self-Harm: Provide the number of incidents that resulted in self-harm while the inmate was in restrictive housing. If there were zero incidents then put 0.

Attempted Self-Harm: Provide the number of incidents that resulted in attempted self-harm while the inmate was in restrictive housing. If there were zero incidents then put 0.

#8. The number of inmates released from restrictive housing directly into the community during the preceding year.

The template will designate one column to capture this data element, to include the following:

Community: Select the most appropriate community placement based on the following options:

- No
- Released in the community
- Released to a mental hospital
- Released to a program
- Other

Other: If other is selected for community placement, write out the applicable placement.

This includes inmates directly released into the community from restrictive housing for completing their sentence (assuming the normal exit process for each facility) and those inmates released to a state mental hospital/mental health treatment facility or other program.

#9. Any other data the correctional unit considers relevant to the use of restrictive housing by correctional facilities in the State.

Please note that no additional data elements were found to be relevant when the reporting requirements were discussed with stakeholders.

#10. Any changes to written policies or procedures at each correctional unit relating to the use and conditions of restrictive housing, including steps to reduce reliance on restrictive housing.

This information can be provided when you email GOCPYVS the data each year. Just note in the email if your facility made any changes to any written policies or procedures and if so what were they.
